1014 Bay Street, Suite 6 • Port Orchard, Washington 98366

Terms

- **50% Deposit required on all promotional products.**

- **Turnaround Time:** Standard turnaround time is 5-7 day delivery after approval of artwork. Quicker turnaround times available.

- **Quotation:** A quotation not accepted within sixty(60) days is subject to review. All prices are based on material costs at the time of quotation.

- **Production Ready Artwork:** We recommend providing artwork via e-mail. Please submit artwork in CMYK color mode only. Vector images are preferable and fonts outlined.

Please submit artwork in one of the following formats:

Adobe Illustrator - preferably as a PDF format. Vector if possible with fonts outlined.

Photoshop images: B & W should be at least 1200 DPI to size for product being ordered.

Color images should be in CMYK color mode at least 300 DPI.

Grayscale images should be at least 300 DPI.

In Design: make sure all files are linked and saved in PDF format for press quality output.

Corel Draw: save as an AI file with Convert Type to Curves selected

(PDF file included for reference).

Camera Ready Artwork submitted should not need any additional touch-up, design, color separation or rearranging for use. We are more than happy to help with any design services needed, they will be charged at \$60 per hour, minimum \$15.00.

- **Experimental Work:** Experimental or preliminary work performed at the customer's request will be charged at current rates and may not be used until the printer has been reimbursed in full for the amount of the charges billed.

- **Creative Work:** Creative work, such as sketches, copy, dummies and all preparatory work developed and furnished by the printer, shall remain his exclusive property and no use of same shall be made, nor any ideas obtained therefrom be used, except upon compensation to be determined by the printer, and not expressively identified and included in the selling.

- **Preparatory Materials:** Working mechanical art, type, negatives, positives, flats, plates, and other items when supplied by the printer, shall remain his exclusive property unless otherwise agreed in writing.

- **Color Matching:** The 4-color process allows you to print as many different colors as you want for one price. All non-standard imprint colors will be converted to the closest 4-color process match. A perfect match cannot be guaranteed.

- **Color Proofing:** Because of differences in equipment, processing proofing substrates, paper, inks, pigments, and other conditions between color proofing and production pressroom operations, a reasonable variation in color between color proofs and the completed job shall constitute acceptable delivery. We strive to get as close to the specified colors. EXACT COLOR MATCH CANNOT BE GUARANTEED ON 4-COLOR PROCESS.

- **Payment Terms:** Payment shall be whatever was set forth in quotation or invoice unless otherwise provided in writing. Claims for defects, damages, or shortages must be made by the customer in writing within a period of fifteen (15) days after delivery of all or any part of the order. Failure to make such claims within the stated period shall constitute irrevocable acceptance and an admission that they fully comply with terms, conditions, and specifications.

Glossary of Terms

Accordion fold In binding a term used for two or more parallel folds which open like an accordion

Basis Weight The weight in pounds of a ream (500 sheets) of paper cut to a given standard size for that grade e.g. 500 sheets 25" x 38" of 50lb book paper weigh fifty pounds - 500 sheets of 17" x 22" of 20lb bond paper weigh twenty pounds. Both "feel" the same in thickness (approx. caliper .0051).

Bleed An extra amount of printed image which extends beyond the trim edge of the sheet or page.

Caliper The thickness of paper, usually expressed in thousandth of an inch.

Chokes and spreads Overlap of overprint images to avoid color or white fringes or borders around image detail. Called trapping in digital imaging systems.

Camera Ready Copy which is ready for photography.

Die-cutting The process of using sharp steel rules to cut special shapes for label, boxes and containers, from printed sheets. Die-cutting can be done on flatbed or rotary presses.

Dot The individual element of a halftone.

Grain In paper making the direction in which most fibers lie which corresponds with the direction the paper is made on a paper machine.

Gripper edge The leading edge of paper as it passed through a printing press.

Halftone The reproduction of continuous-tone images, through a screening process which converts the image into dots of various sizes and equal spacing between centers.

Makeready All work done to set up a press for printing.

PMS ink color The use of standard colors, color charts, and mixing formulas to create a wide range of desired color.

Signature The name given to a printed sheet after it has been folded.

Work and Tumble To print one side of a sheet of paper, then turn it over from gripper to back using the same side guide and plate to print the second side.

Work and Turn To print one side of a sheet of paper, then turn it over from left to right and print the second side using the same gripper and plate but opposite side guide.

Fine Arts Litho = Quality Printing

li•thog•ra•phy 1: the process of printing from a plane surface (as a smooth stone or metal plate) on which the image to be printed is ink: receptive and the blank area - repellant.
